This page left blank intentionally.
In this section, we go over everything you need to know to set up your Moneris iCT250.

You can also view our setup videos online at moneris.com/support-iCT250.
Before you get started

1. Please confirm that you received all the necessary items in your Welcome Kit.

2. If you are setting up the terminal to work as a semi-integrated device with your electronic cash register (ECR), please note that the iPP320 PINpad is not supported (i.e., a semi-integrated terminal cannot be used in conjunction with an attached iPP320 PINpad).

3. If your terminal will communicate with the Moneris host over high-speed Ethernet, review the Moneris IP Readiness Checklist (available at moneris.com/checklist) to ensure that your Ethernet service is ready to support your terminal.
3. Make sure you have the following information:

- Your 13-digit Moneris **Merchant ID** (found in your “Important information” email).
- Settlement responsibility (found in your Welcome Email): **System Close** (Moneris closes your batch at the end of each day) or **Merchant Close** (you are responsible for closing your batch at the end of each day).
- Optional features e.g. **gift cards**, **loyalty cards**, **Ernex Terminal ID** (found in your Moneris Gift & Loyalty Welcome letter).

   If any of the above required elements are missing, please call Moneris Customer Care toll-free at **1-866-319-7450**.

4. Do one of the following:

- **If you are setting up a standalone terminal** (with or without an external iPP320 PINpad): Proceed to Hardware setup on page 8.
- **If you are setting up a semi-integrated terminal** to work with your electronic cash register (ECR): Refer to the *Moneris iCT250 Semi-Integrated Reference Guide* available at moneris.com/support-iCT250, and follow the instructions in the IMPORTANT: READ FIRST section of that guide.
**Hardware setup**

Follow these instructions to set up your terminal hardware. If your location does not have Ethernet networking, skip to step 2 to setup a dial connection.

<table>
<thead>
<tr>
<th>1</th>
<th>Hi-Speed Ethernet setup</th>
</tr>
</thead>
<tbody>
<tr>
<td>a.</td>
<td>Plug one end of the Ethernet cable into the Magic Box port labelled ETH.</td>
</tr>
</tbody>
</table>
| b. | Plug the other end of the Ethernet cable into the router/switch/hub/internal wiring — whatever is applicable to the high-speed Internet service at your location. (If necessary, please refer to the Moneris **IP Readiness Checklist** available at [moneris.com/checklist](http://moneris.com/checklist).)  

**Recommendation:** Set up dial backup as well (follow the Dial backup instructions on page 16) so that the terminal can use dial backup if your Internet service is temporarily unavailable. | MAGIC BOX  

**ETHERNET CABLE**
### Dial / Dial Backup setup (optional)

<p>| | |</p>
<table>
<thead>
<tr>

<tr>
<td><strong>k.</strong></td>
<td><strong>Position the back panel so that its upper two corner tabs are slotted into the openings at the top of the terminal.</strong></td>
</tr>
<tr>
<td><strong>l.</strong></td>
<td><strong>Close the back panel until it snaps shut. (The PINpad cable should be secured as it passes through the middle opening between the closed panel and the terminal.)</strong></td>
</tr>
<tr>
<td><strong>m.</strong></td>
<td><strong>Go to step 4 below.</strong></td>
</tr>
</tbody>
</table>
4 Connect the two-part power supply cable

a. Insert the plug connector into the adaptor box to form the complete power cable.

b. Insert the power cable's barrel connector into the Magic Box's circular port labelled with the power symbol.

c. Plug the other end of the power cable into a power source. The terminal (and external iPP320 PINpad if attached) will power on.

**Recommendations:** Always plug the power cable into the power source last to avoid power surges. Use a power bar equipped with surge protection if possible. Do not use the power cable from your existing terminal, as it may damage your new terminal.

**Important:** You must use the exact power adaptor and cables provided by Moneris to work with the Moneris iCT250 terminal. Failure to do so may affect the operability of, or cause damage to, the equipment.

d. Wait for the terminal to display TERMINAL SETUP REQUIRED.
   - If you attached an external PINpad, wait for it to display the CPX version screen as shown here.

e. Go to step 5, “Remove the protective film” below.

5 Remove the protective film (if applicable)

a. If your iCT250 terminal has a protective film covering the display screen, peel the film off.

   **Hint:** Peel from the top right to the bottom left corner.

b. If you have the optional iPP320 PIN Pad, and there is a protective film covering the display screen, peel the film off as described above.

c. Go to step 6 “Install the paper roll” on page 12.
6 Install the paper roll

a. Lift the printer latch up, and then pull back to open the lid and expose the paper well.

b. Insert the paper roll into the paper well with the loose end unrolling from the bottom of the roll towards the front of the terminal.

c. Unroll enough paper to extend at least one inch (2.5 cm) past the faceplate.

d. Close the lid, and press down to snap it back into place so that the extended paper is pressed securely between the closed lid and the top of the faceplate.

Note: The paper should unroll back over the top of the printer, not unroll over the faceplate.

Note: To advance the paper from the printer when the lid is closed, you must press and hold down the yellow key when the terminal is powered on. DO NOT attempt to manually advance the paper by pulling it as this will damage the printer.

What to do next

Your hardware setup is complete. The next step is to configure the terminal, and the external PINpad if applicable. Choose one of the options below.

If you are setting up the terminal to work as:

- a standalone device with an external PINpad, proceed to Enabling the external PINpad on page 21;
- a standalone device without an external PINpad, proceed to Communications setup on page 14;
a semi-integrated device with your ECR, refer back to the *Moneris iCT250 Semi-Integrated Reference Guide*,
and continue the applicable overview setup procedure beginning at step 3, “Enable Semi-Integrated mode
on the terminal...”.
Communications setup

Your terminal must be configured to communicate with the Moneris host.

1. Do one of the following based on your requirements:
   - If you are using dynamic IP as default, proceed to Using dynamic IP below.
   - If you are using static IP as default, proceed to Using static IP on page 14.
   - If you are using dial as default, proceed to Using dial on page 16.
   - If you are using dial as backup, proceed to Using dial as backup on page 16.

Tips for moving through the menus

- Press the key to answer "yes" to any questions or to scroll down.
- Press the key to answer "no" or to scroll up.
- Press the green key to select a menu item or finish entering information and move on to the next step.

Using dynamic IP

The terminal is already configured for dynamic IP communications.

1. Do one of the following:
   - If you are using dial backup and need to enter a prefix (e.g., 9) to connect to an outside line, proceed to Setting a dial prefix on page 16.
   - If you are not using dial backup or you are but do not need to enter a prefix, proceed to Initialization and logon on page 19.

Using static IP

Contact your Internet Service Provider (ISP) to gather the following information: the terminal’s IP address, Mask ID, Gateway address, and DNS addresses.

Note: If you are configuring the terminal to work as a semi-integrated device with your ECR, you will also need to know the port number that the ECR is configured to use to communicate with the terminal.

1. Press the Admin key twice, key in 13, and press the green key.
2. Press the green key to select TERMINAL SETUP.
3. Press the green key to select TERMINAL TYPE.
4. Scroll up to STATIC, and press the green key.
5. When the TERMINAL SETUP menu appears, enter the static IP information as follows:

   Note: To enter a decimal point, press the 0 (zero) key and then press the Admin key.

   a. Scroll down to TERMINAL ADDR, and press the green key. Then key in the terminal’s IP address, and press the green key.
b. Scroll down to **MASK ID**, and press the green  key. Then key in the terminal’s Mask ID, and press the green  key.

c. Scroll down to **GATEWAY**, and press the green  key. Then key in the terminal’s Gateway address, and press the green  key.

d. Do one of the following:
   - **If you are setting up a standalone terminal (with or without an external PINpad)**: Skip this step, and go directly to step 6.
   - **If you are setting up the terminal to work as a semi-integrated device with your ECR**: Scroll down to **PORT NUMBER**, and press the green  key. Then key in the port number that the ECR is using to communicate with the terminal, and press the green  key.

6. Press the red  key once to return to the ETHERNET SETUP menu.

7. Enter the terminal's DNS address information:
   a. Scroll down to **DNS SETUP**, and press the green  key.
   b. Scroll down to **PRIM ADDRESS**, and press the green  key. Key in the terminal's Primary DNS Address, and press the green  key.
   c. Scroll down to **SEC ADDRESS**, and press the green  key. Key in the terminal's Secondary DNS Address, and press the green  key.

8. Press the red  key twice. The REBOOT TERMINAL message appears, and then the terminal reboots.

9. When the terminal displays TERMINAL SETUP REQUIRED or REINITIALIZATION REQUIRED, go to the next step.

10. Press the Admin  key twice, key in **13**, and press the green  key.

11. When the ETHERNET SETUP menu appears, press the red  key once.

12. When the terminal displays TCP HOST CONNECTION OK PRESS OK, press the green  key.
   - If TCP CONNECTION FAILED or HOST CONNECTION FAILED appears, see page 17 for troubleshooting.

13. When the terminal displays TERMINAL SETUP REQUIRED or REINITIALIZATION REQUIRED, do one of the following:
   - If you are using dial backup and need to enter a prefix (e.g., 9) to connect to an outside line, proceed to *Using dial backup* on page 16.
   - If you are not using dial backup or you are but do not need to enter a prefix, proceed to *Initialization and logon* on page 19.
Using dial

To set up dial as your default method of communicating with the Moneris host, follow these steps.

1. Press the Admin \# key twice, key in 08 and, press the green green key.
2. Press the green green key to select COMMS TYPE.
3. Scroll up to DIAL, and press the green green key.
4. When the GENERAL PARAMETERS menu appears, press the red red key two times.
   The TERMINAL SETUP REQUIRED or REINITIALIZATION REQUIRED message appears.
5. Do one of the following:
   - If you need to enter a prefix (e.g., 9) to connect to an outside line, follow the steps under Setting a dial prefix on this page.
   - If you do not need to enter a prefix, proceed directly to Initialization and logon on page 19.

Using dial backup (optional)

If you do not need to enter a prefix (e.g., 9) to connect to an outside line, proceed directly to Initialization and logon on page 19. If you do need to enter a prefix to connect to an outside line, follow the steps under Setting a dial prefix (directly below).

Setting a dial prefix

1. Press the Admin \# key twice, key in 15, and press the green green key.
2. Press the green green key to select PREFIX.
3. Key in the prefix number (e.g. 9), and press the green green key.
4. Press the red red key twice.
   When the terminal displays TERMINAL SETUP REQUIRED or REINITIALIZATION REQUIRED, proceed to Initialization and logon on page 19.
# Communications troubleshooting

<table>
<thead>
<tr>
<th>Error Message</th>
<th>Solution</th>
</tr>
</thead>
</table>
| HOST CONNECTION FAILED or TCP CONNECTION FAILED | The terminal cannot establish a connection to the Moneris host. **If the terminal is configured for IP:**  
   1. Press the green key to return to the TERMINAL SETUP REQUIRED screen.  
   2. Confirm that the Ethernet cable is securely plugged into the ETH port located on the Magic Box. Refer to High-Speed Ethernet setup on page 8.  
   3. Confirm that the router and hub/switch (if any) are functioning (refer to the Moneris IP Readiness Checklist at moneris.com/checklist to confirm that your firewall rules have been updated).  
   4. Confirm that the network is functioning.  
      - Public Internet: Contact your ISP (Internet service provider) for assistance.  
      - Corporate WAN: Call your corporate help desk to confirm that the corporate WAN is functioning properly.  
   5. Once you have confirmed that your network is functioning: Press the Admin key twice, key in **11**, and press the green key.  
   6. When the HOST SETUP menu appears, press the red key once.  
   7. Do one of the following depending on what appears:  
      - If TCP HOST CONNECTION OK PRESS OK appears, press the green key. Go to step 8.  
      - If the TCP CONNECTION FAILED error recurs (static IP configuration only):  
        a. Press the Admin key twice, key in **13**, and press the green key.  
        b. Press the green key to select **TERMINAL SETUP**.  
        c. Re-enter the static IP values. Go back to Using static IP (page 14), and continue at step 7.  

Table continues on the next page.
8. Do one of the following:
   - If you are using dial backup and need to enter a prefix (e.g., 9) to connect to an outside line, proceed to Setting a dial prefix on page 16.
   - If you are not using dial backup or you are but do not need to enter a prefix, proceed to Initialization and logon on page 19.

If the terminal is configured for dial:
1. Press the green key to return to the TERMINAL SETUP REQUIRED screen.
2. Confirm that the dial cable is securely plugged into the “IN” port located on the Magic Box.
3. Confirm that the COMM TYPE is set to DIAL. Refer to Using dial on page 16.
4. If the terminal must use a prefix to dial out, ensure that the dial PREFIX parameter has been configured correctly. Refer to Setting a dial prefix on page 16.
5. Return to Initialization and logon on page 19.
Initialization and logon

Before processing any transactions, you must initialize your terminal with the Moneris host and logon.

1. Do one of the following:
   - **If you are setting up a standalone terminal** (with or without an external PINpad): Go directly to step 2.
   - **If you are setting up a semi-integrated terminal** to work with your ECR: Refer back to your *Moneris iCT250 Semi-Integrated Reference Guide*, and continue the applicable overview setup procedure beginning at step 5 (“Configure the terminal-to-ECR communications parameters…”).

2. Press the Admin \(\text{key}^\text{a}^\text{b}\) key twice, key in 01, and press the green \(\text{key}\).

3. When MERCHANT ID appears, key in your current 13-digit merchant ID, and press the green \(\text{key}\).

4. When PHONE NUMBER appears, key in the number as follows, and press the green \(\text{key}\).

<table>
<thead>
<tr>
<th>If your merchant ID begins with:</th>
<th>Key in:</th>
</tr>
</thead>
<tbody>
<tr>
<td>00301</td>
<td>1 888 699 7299</td>
</tr>
<tr>
<td>00302</td>
<td>1 888 358 8602</td>
</tr>
<tr>
<td>00304</td>
<td>1 888 332 8433</td>
</tr>
</tbody>
</table>

5. Wait while the terminal communicates with the Moneris host. Over the next few moments, the screen will display SENDING, RECEIVING, and PROCESSING.
   - If SWIPE ADMIN CARD appears, swipe one of the white POS Admin cards (provided with your new terminal).

6. Wait while the terminal communicates with the Moneris host to log on.

7. If the initialization and logon are successful, the terminal screen should display one of the following READY screens (which will always display when your terminal is ready to be used):
   - **Standalone terminal:**
     - PURCHASE ENTER AMOUNT appears on the terminal. (If an external PINpad is attached, “WELCOME/BONJOUR” appears on the PINpad.)
   - **Semi-integrated terminal:**
     - WELCOME/BONJOUR appears on the terminal.

8. If you need to advance the paper from the printer, you must press and hold down the yellow \(\text{key}\) when the terminal is powered on.

   **Note:** *Once the paper roll is installed and the printer lid is closed, DO NOT attempt to manually advance the paper by pulling it as this will damage the printer.*

9. Your terminal is ready to process transactions.
Enabling the admin password for manual entry protection

The ENABLE PSWD? parameter protects the manual entry of card information on the terminal keypad. By default, a POS Admin card (shipped with your terminal) must be swiped any time card information is manually entered in order to continue the transaction. Moneris recommends that you change this parameter by setting up an admin password to be entered instead of swiping the POS Admin card. To change this parameter and set up an admin password, follow these steps.

1. Decide on your password:
   - It must be 5 to 10 numbers.
   - You cannot use consecutive numbers such as 12345 or 98765, or repeating numbers such as 22233.
   - You will have 60 seconds to enter it.

2. From the READY screen, press the Admin \key twice, key in 22, and press the green key.

   The ENABLE PSWD? prompt appears.

3. When SWIPE ADMIN CARD appears, swipe your POS Admin card.

   The ENTER NEW 5-10 DIGIT ADMIN PSWD prompt appears.

   **Note:** You have 60 seconds to enter the password.

4. Select **YES** by pressing the green key.

   The ENTER NEW ADMIN PSWD prompt appears.

5. Key in the password you decided on in step 1, and press the green key.

   The RE-ENTER NEW ADMIN PASSWORD prompt appears.

6. Key in the password again and press the green key.

   The message ADMIN PASSWORD SET UP SUCCESSFULLY appears briefly on the terminal, followed by the SECURITY menu.

7. To return to the READY screen, press the red key twice.

For instructions on how to change the password after you have set it up or what to do if the password is locked, refer to the *ict250 Operating Manual* in WebHelp format at moneris.com/support-ict250.

Now you can proceed to configure optional functions on the terminal that control its behavior.
Additional options

There are several options that you can choose to enable on your terminal to enhance its functionality.

**Note:** All instructions in this section begin at the terminal’s READY screen.

Enabling the external PINpad (if attached)

Important: If you are setting up your terminal as a semi-integrated device to work with your ECR, do not follow these steps to enable an external PINpad. The PINpad option is not supported in Semi-Integrated mode.

1. Unplug the terminal’s power cable from the power source and then replug it to restart the hardware.
2. On the PINpad, do the following:
   
   a. As soon as the PINpad displays the CPX version screen, press the green \[Enter\] key within 3 seconds.

   b. When the PIN/CARD BEEP screen appears, go to the next step.
      
      **Note:** If this screen does not appear, repeat step 1.

   c. Press the \[Enter\] key until the COM PORT screen appears.

   d. Press the yellow \[Enter\] key until USB-9600 appears.

   e. Press the green \[Enter\] key to select **USB-9600**.

   f. When the PINpad displays the CPX version screen, go to the next step.

3. On the terminal, do the following:

   a. Press the Admin \[Enter\] key twice, key in **08**, and press the green \[Enter\] key.

   b. Scroll up to **EXT PINPAD**, and press the green \[Enter\] key.

   c. When ENABLE EXTERNAL PINPAD? appears, press the \[Enter\] key (YES).

4. Wait for the PINpad to display WELCOME/BONJOUR.

5. When the terminal displays TERMINAL SETUP REQUIRED, proceed to **Communications setup** on page 14.
Printing the contactless logo on contactless transaction receipts

When this feature is enabled, the contactless logo will be printed on all contactless transaction receipts.

1. Press the key twice, key in 08, and press the green key.
2. Scroll up to CTLS LOGO, and press the green key.
3. Scroll to ENABLE, and press the green key.
4. Press the red key twice to return to the READY screen.

Enabling Tip Entry, Cashback, or Invoice Number

1. Press the Admin key twice, key in 08, and press the green key.
2. Use the key to scroll down to the option that you want to enable (e.g. TIP ENTRY, CASH BACK, or INVOICE NUMBER), and press the green key.
   a. If you are enabling tip entry, follow these additional steps:
      i. Scroll to a tip entry type (TIP BY AMOUNT or TIP BY PERCENT or TIP BY $ AND %), and press the green key.
      ii. Press the red key once, and then go to step 4.
3. Enable the option by pressing the key (YES).
4. Press the red key twice to return to the READY screen.

   Note: To change the default values for the tip and cash back options, or to enable enhanced tip prompting, refer to the iCT250 Operating Manual in WebHelp format at moneris.com/support-iCT250.

Changing printer options

The printer is set up to automatically print the second receipt 10 seconds after it prints the first receipt.

Note: If you don’t want to wait, simply press the green key to print the second receipt immediately.

To change this setting:
1. Press the Admin key twice, key in 14, and press the green key.
2. Scroll down to PRINT DELAY, and press the green key.
3. Key in the number of seconds that the printer should wait before automatically printing the second receipt and press the green key.
   Note: If you key in 99, the printer will always wait until the green key is pressed before printing the second receipt.
4. Press the green key to return to the PRINTER CFG menu.
5. Press the red key twice to return to the READY screen.

Note: Shop for point-of-sale supplies and paper online at shop.moneris.com.
Changing the terminal language

1. Press the Admin key twice, key in 04, and press the green key.
2. Scroll to a language, and press the green key.
3. Press the red key twice to return to the READY screen.

Enabling loyalty and gift cards

Didn’t order a loyalty program and gift cards but would like to find out more? Please call us at 1-866-319-7450.

1. Press the Admin key twice, key in 310, and press the green key.
2. Press the green key to select ENABLE ERNEX.
3. Press the key to select YES.
4. Press the green key to select INITIALIZATION.
5. Key in the Ernex Terminal ID and press the green key.
6. Wait while the terminal communicates with the Moneris host.
   - If CLEAR TERMINAL STORAGE? appears, press the key to select YES.
     The READY screen appears.
7. Your terminal is ready to process loyalty card and gift card transactions. For instructions on performing:
   - gift card transactions, refer to the Moneris iCT250 Gift Card Program Reference Guide.
   - loyalty card transactions, refer to the Moneris iCT250 Loyalty Programs Reference Guide.

Enabling tip entry (gift cards)

1. Press the Admin key twice, key in 310, and press the green key.
2. Scroll down to TIP ENTRY, and press the green key.
3. Press the key to select YES.
4. Press the red key to return to the READY screen.

Note: To change the default values for tip entry, or to enable enhanced tip prompting for gift cards, refer to the iCT250 Operating Manual in WebHelp format at moneris.com/support-iCT250.
In this section, we go over everything you need to know to use your Moneris iCT250, including how to perform transactions and end-of-day processes.
Moneris iCT250

Use this handheld, all-in-one terminal and PINpad to process transactions at the point of sale (POS).
When prompted, you (and sometimes your customer) will key in information on the terminal. If your customer is required to key in information, pass the handheld to the customer. When the customer has finished keying in the information, retrieve the terminal and complete the transaction.
Terminal keys and hardware

1  Function keys
   - Move through the menu items on the display.
   - Select the option displayed above the key: e.g. if YES displays above the key, press that key to select YES. If ▲ displays above the key, press that key to scroll up.
   - To select an item, scroll through the list until the item is highlighted (e.g. LOGON vs. LOGON), and then press the green key.

2  Alpha-numeric keys
   - Key in numbers, letters and Admin (with the Admin key).

3  Admin key
   - Go to the MAIN MENU from the READY screen.
   - Select letters and Admin (with alphanumeric keys).

4  Red Cancel key
   - Cancel a transaction.
   - Move back one menu at a time.

5  Yellow Correct key/Paper feed key
   - Clear displayed data one character at a time.
   - Press key (hold down) to advance the receipt paper in the printer.

6  Green OK key
   - Accept displayed data.
   - Submit data.
   - Select highlighted menu item.

7  Printer
   - To advance receipt paper, see label 5 above.

8  Keypad

9  Magnetic stripe reader

10 Chip reader

11 Display screen/Contactless reader (internal)

Note:  If the terminal’s back light dims (keys lose their bright glow), press any key. The keys function even if the back light is dimmed.
Optional external PINpad

If an optional Moneris iPP320 external PINpad is connected to the iCT250 terminal and your merchant account is configured for it, the customer uses the PINpad to input transaction information when prompted.

General guidelines for the iPP320 PINpad

- When the CONTINUE ON PINPAD prompt appears on the iCT250 terminal, pass the iPP320 PINpad to your customer.
- The customer follows the prompts on the PINpad.
- For contactless transactions, the TAP CARD prompt always appears on the PINpad.
- Keep the terminal in front of you to complete the transaction.
- The PINpad displays WELCOME/BONJOUR while in its idle state.
Card types

The Moneris iCT250 supports the following card types and formats. These card types are not mutually exclusive. A single card can include a magnetic stripe, a chip, and contactless functionality.

Magnetic stripe card
- A card with a magnetic stripe
- The card is swiped on the magnetic stripe reader

Chip card
- A card with a chip
- The card is inserted into the chip card reader

Contactless card
- In this guide, the term “contactless card” includes:
  - a card with contactless functionality; supported card brands include: Visa®, Mastercard®, American Express®, Discover®, and Interac®
  - a mobile device, such as a smartphone, tablet or smartwatch
  - other contactless-enabled items such a key fob or a mobile tag
- The card is tapped on the contactless reader.
- All contactless card formats and any related software are the responsibility of the cardholder (e.g., downloading a digital app from their financial institution).
- Cardholders with a mobile device (e.g., smartphone) are responsible for loading their card information into their digital wallet.
Cardholder verification

Cardholder verification methods (CVM)

Many transactions require cardholder verification. This means your customer must provide proof that they are the valid cardholder by performing one of the cardholder verification methods below. The terminal will prompt your customer (or you) for the appropriate CVM.

When verification is required, follow these general guidelines:

- for a transaction where a card is swiped, the cardholder signs the merchant copy of the receipt.
- for a transaction where a card is inserted, the cardholder enters their PIN on the terminal (or on the external PINpad if applicable). In some cases, the cardholder may need to sign the merchant copy of the receipt.
- for a transaction where a card is tapped, the cardholder signs the merchant copy of the receipt.
- for a transaction where a mobile device is tapped, the cardholder enters their passcode on their mobile device. If the cardholder has already entered their passcode, they will not be prompted again during the transaction.

Cardholder verification limit

- This is the maximum dollar amount for performing a tapped credit transaction without cardholder verification.

To determine the cardholder verification limit for a card, print a Configuration Report (see instructions on page 53). Look near the end of the report for the **CVM LIMITS** section, then look under each card type for the **DOMESTIC CVM LIMIT**.

- If the final transaction amount is greater than the limit specified (in the case of Visa, equal to or greater than) then the cardholder must perform one of the cardholder verification methods outlined on page 29.

- In most cases, this limit does not apply to:
  - Credit transactions where the card is swiped or inserted
  - Interac Debit transactions where the card is swiped or inserted

These transactions require cardholder verification regardless of the transaction amount.
Card entry options

Insert: Chip cards

1. SWIPE OR INSERT CARD or SWIPE/INSERT/TAPCARD displays on the terminal or external PINpad if attached.
2. Either you or the customer inserts the card into the device’s chip reader.
   
   **Note:** Unless the device prompts otherwise, do not swipe a chip card even if the card has a magnetic stripe.
3. The customer may be prompted to key in a PIN.
4. The chip card must **remain inserted** until the REMOVE CARD prompt displays.

Wave/Tap: Contactless cards

1. SWIPE/INSERT/TAP CARD displays on the terminal or external PINpad if attached.
2. The customer taps their card over the 🛡 icon that appears on the display screen.
   
   **Note:** The customer does not need to enter a PIN on the terminal or external PINpad. However, if the customer is using a mobile device, they may be directed to enter a passcode on their smartphone or tablet.
3. Note the following:
   - Your merchant account must be configured for contactless functionality.
   - Only Purchases, Refunds, and Balance Inquiries can be processed using a contactless card.
   - The transaction amount must be equal to or less than the maximum Contactless Transaction Limit set for the card (see below).
   - The card must be within 0.5 in. (1.3 cm) of the screen, but it does not have to touch it.
   - The card must be tapped or waved by itself (the customer cannot leave the card in their wallet and wave it in front of the screen).
Contactless Transaction Limit (CTL)

For each card type, there is a limit on the dollar value that can be processed as a contactless transaction.

- **Credit Cards (and some Debit cards):** To determine the CTL for a card, print a Configuration Report (see instructions on page 53). Look near the end of the report for the **CVM LIMITS** section, then look under each card type for the **DOMESTIC TXN LIMIT**. If this limit shows a value of ‘9999’, then there is no contactless limit.

  **Note:** If a contactless credit card is tapped for an amount that exceeds its maximum CTL, the terminal or PINpad will display CONTACTLESS TRANSACTION LIMIT EXCEEDED (see message on page 58).

- **Mobile Devices:** For Mastercard, look for the **MC-M TXN LIMIT**. If this limit shows a value of ‘9999’, then there is no contactless limit for Mastercard on mobile devices. For all other cards, use the **DOMESTIC TXN LIMIT** as specified above.

- **Interac Flash Cards:** The maximum CTL is determined by the card and does not appear on any report.

  **Note:** If an Interac Flash card is tapped for an amount that exceeds its maximum CTL, the terminal or PINpad will display TAP FAILED PLEASE INSERT OR SWIPE CARD (see message on page 59).

### Swipe: Magnetic stripe cards

1. **SWIPE CARD** or **SWIPE OR INSERT CARD** or **SWIPE/INSERT/TAP CARD** displays on the terminal or external PINpad if attached.

2. Swipe the card on the device’s magnetic stripe reader.

  **Note:** If the card has a chip and the terminal or external PINpad if attached is enabled to read chip cards, the card must be inserted into the chip reader.

### Manual card entry

If all available card entry methods fail, you may manually enter the card number for credit cards and some chip debit cards.

1. **SWIPE CARD** or **SWIPE OR INSERT CARD** or **SWIPE/INSERT/TAP CARD** displays on the terminal or external PINpad if attached.

2. Key in the card number on the terminal, and press the green \[\] key.

3. Key in the card’s expiry date (MMYY) on the terminal, and press the green \[\] key.

   - If **ENTER ADMIN PASSWORD** appears, key in your admin password and press the green \[\] key.
   - If **SWIPE ADMIN CARD** appears, swipe your POS Admin card on the terminal.
   - If **TAKE MANUAL IMPRINT OF CARD AND PRESS OK** appears, take a manual imprint of the card, and press the green \[\] key.
Transactions

All instructions in this section begin at the READY screen. To access the READY screen from any other screen, press the red \[ذلك\] key repeatedly until the READY screen appears.

General guidelines

1. If the terminal is configured to use Ethernet, ensure that the Ethernet icon \[ذلك\] (at the top of the terminal display screen) is coloured green.
2. Determine the transaction to be processed (e.g., Purchase or Refund).
3. Establish the means of payment (credit or debit).
4. Enter the card data on the terminal or external PINpad if attached (see pages 30 - 31).
5. Follow the prompts* (see pages 33 - 45).
6. Process receipts (see pages 48-50).

*Prompts may vary depending on variables such as terminal setup, merchant setup and card type.

Note: Some debit cards may display Cashback and/or Account Selection and PIN prompts after the device has been returned to you; hand the device back to the customer to respond to these prompts.

Admin code shortcuts

To bypass scrolling through menus to select a transaction, use the Admin codes to jump directly to a transaction. Admin codes can be found in this section in square brackets beside the transaction name (e.g. Logon [02] means the Admin code for logging on is 02).

To use an Admin code:

1. Press the Admin \[ذلك\] key until ENTER ADMIN CODE appears.
2. Key in the Admin code, and press the green \[ذلك\] key.

   The transaction appears.

To print a list of all Admin codes:

1. Press the Admin \[ذلك\] key until ENTER ADMIN CODE appears.
2. Key in 40, and press the green \[ذلك\] key.

   The list is printed.
**Purchase [100]**

Credit or debit purchase of goods or services.

1. **If PURCHASE is the default, key in a Purchase amount.** (If PURCHASE is not the default: Press the Admin key, select **TRANSACTIONS**, select **PURCHASE**, and then key in a Purchase amount.)
2. Press the green key.
3. Follow the merchant prompts:
   - If tip entry is disabled, follow the merchant prompts table on page 35.
   - If tip entry is enabled, follow the merchant prompts table on page 42.

**Partially approved Purchase**

A Partial Approval of a purchase transaction occurs when a cardholder pays for a purchase with a pre-paid credit card but the value on the pre-paid card is less than the purchase amount.

The amount on the pre-paid card is approved, i.e. part of the total purchase amount is approved. Prompts are displayed indicating how much of the purchase amount is still owed (e.g. AMOUNT DUE $5.00). That amount can then be paid by another tender type, e.g. a credit or debit card.

A Refund credits a customer’s account. A Void cancels the original Purchase or Refund.

*Note:* Credit card Voids must be processed in the same batch as the original transaction.

1. Press the Admin key, select **TRANSACTIONS**, and then select the transaction (REFUND or VOID–PURCHASE or VOID–REFUND).
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
2. Key in the transaction amount, and press the green key.
3. Follow the merchant prompts table on page 35.

   *Note:* To refund or void a partially approved purchase, use the TOTAL PAID amount on the Partial Approval receipt. See page 50.

**Pre-Authorization [102]**

Authorization if the final Purchase amount is unknown (e.g. hotel or car rental).

1. **If PRE-AUTH is the default, key in a Pre-Auth amount.** (If PRE-AUTH is not the default: Press the Admin key, select **TRANSACTIONS**, select **PRE-AUTH**, and then key in a Pre-Auth amount.)
2. Press the green key.
3. Follow the merchant prompts table on page 35.

   *Note:* When the final Purchase amount is known, you must perform an Advice for the final amount using the same card number (see Advice options starting on page 34).
Cheque Authorization [105]

1. Press the Admin key, select TRANSACTIONS, and select CHEQUE AUTH.
2. Do one of the following:
   - To do the authorization by credit card, select CREDIT CARD.
   - To do the authorization by driver’s licence, select DRIVERS LICENCE.
3. Key in the cheque amount, and press the green key.
4. Follow the merchant prompts table on page 37.
5. On the cheque, record the 8-digit APPROVED number, then press the green key.
   
   Note: Receipts are not printed. ID types and province/state codes are provided by the authorization service.

Advice using Sequence Number [103] / Force Post [103]

An Advice transaction completes or cancels a Pre-Auth. A Force Post transaction completes a voice-authorized purchase.

Note: The Advice transaction must be processed on the same terminal as the original Pre-Auth.

1. Press the Admin key, select TRANSACTIONS, and then select P-A ADVICE.
2. Follow the merchant prompts table on page 37.
3. After processing an Advice, the terminal returns to the FIND ORIGINAL TRANSACTION? prompt.
   - To go back to the READY screen, press the red key twice.
   - To process another Advice, return to step 2.

Advice List [109]

Completes or cancels a Pre-Auth from a list.

Note: The Advice List (P-A ADVICE LST) will appear only if Tip Reporting is enabled. The Advice must be processed on the same terminal as the original Pre-Auth.

1. Press the Admin key, select TRANSACTIONS, and then select P-A ADVICE LST.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears: To narrow the search by Clerk ID, key in a clerk ID, and press the green key. Otherwise, press the green key for retrieval regardless of Clerk ID.
2. When ENTER AMOUNT or DATE or BATCH NUMBER appears: To narrow the scope of your search, key in the required data, and then press the green key. Otherwise, for retrieval regardless of the specified prompt, simply press the green key without entering the required data.
3. Scroll to the Pre-Auth that you want to complete or cancel (e.g., “PA1234 $#.##”), and press the green key.
4. Press the key (COMPL), and follow the merchant prompts table on page 37.
5. After processing an Advice:
   - To go back to the READY screen, press the red key twice.
   - To process another Advice:
     - From the ENTER AMOUNT screen, return to step 2, or
     - From the list of Pre-Auth transactions, return to step 3.

**Balance Inquiry [110]**

Prints a cardholder receipt indicating the dollar value available on a pre-paid credit card.

1. Press the Admin key, select **TRANSACTIONS**, and then select **BAL INQUIRY**.
2. Follow the prompts but note:
   - The terminal only prints one copy of the balance inquiry receipt: the cardholder copy.
   - The balance is not displayed on the screen, only an APPROVED message.

**Prompts without tip entry**

**Merchant prompts: Purchases/Pre-Auths/Refunds/Voids**

This table lists in order of appearance the prompts (and the actions to take for each) that you might see on the terminal during a Purchase with tip entry disabled, Pre-Auth, Refund, or Void. For a **Purchase with tip entry enabled**, refer to page 42.

*Note: Only some of the prompts listed below will appear for any one transaction.*

### Prompts with tip entry

When tip entry is enabled on the terminal, the order of prompts is revised to display customer prompts, including tip entry, in a more efficient way for the customer. Follow the tables below when performing a purchase transaction with tipping enabled.

**Note:** Only some of the prompts listed below will appear for any one transaction.

<table>
<thead>
<tr>
<th>Merchant prompt</th>
<th>Merchant action</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENTER CLERK ID</td>
<td>Key in your Clerk ID, and press the green  key.</td>
</tr>
<tr>
<td>ENTER INVOICE NO</td>
<td>Key in an alpha/numeric identifier, and press the green  key; or To bypass this prompt, simply press the green  key.</td>
</tr>
<tr>
<td>CUSTOMER PRESS OK TO CONTINUE</td>
<td>Pass the terminal to the cardholder (see Customer prompts on terminal on page 43).</td>
</tr>
<tr>
<td>CONTINUE ON PINPAD</td>
<td>Pass the PINpad to the cardholder (see Customer prompts on PINpad on page 45). To change the language on the PINpad to French, press the  key.</td>
</tr>
<tr>
<td>ENTER LAST 4 DIGITS</td>
<td>Key in the last four digits of the card number, and press the green  key.</td>
</tr>
<tr>
<td>REGULAR MAIL/TEL</td>
<td>• If cardholder is present: Press the green  key to select REGULAR. • If cardholder is not present: Scroll to MAIL/TEL, and press the green  key.</td>
</tr>
<tr>
<td>SINGLE RECURRING INSTALLMENT OTHER</td>
<td>Scroll to the option that best describes the transaction, and press the green  key.</td>
</tr>
</tbody>
</table>
### Merchant prompts

Receipts

Signing credit card receipts

Merchant copy
Always retain this copy for your records, but note:

- If a signature line is printed, obtain the cardholder’s signature.
- You do not need to obtain a signature if any of the following messages are printed:
  
  - VERIFIED BY PIN
  - NO SIGNATURE REQUIRED

Cardholder copy
Give this copy to the customer, but note:

- If a merchant signature line is printed, sign this copy.

Reprinting receipts

Reprint customer receipt or last report [29]
Prints a duplicate of the last printout.

1. Press the Admin key, select ADMIN, and select REPRINT.
   The receipt or report prints.

Reprint merchant receipt
See Reprint merchant receipt on page 51.

Card masking
To reduce the risk of fraudulent card use, masking and truncation are applied to card numbers printed on receipts. Masking replaces a card’s numbers with asterisks (e.g., ************1234).

Truncation prints only the last 4 digits of a card (e.g., 1234). The expiry date is not printed on any copy of any receipt.
Contactless transactions
Receipts can be suppressed for tapped credit transactions that do not require cardholder verification. Refer to printer configuration in the *Moneris iCT250 Operating Manual* in WebHelp format located at moneris.com/support-iCT250.
Receipts are always printed for *Interac* Flash transactions.

Receipt samples
These sample receipts will help you to locate the sequence number (for Advices) or the authorization number (for refunds and voids).

Pre-Auth receipt sample

Original receipt sample
Partial Approval receipt sample

- Total paid with pre-paid credit card
- Total amount still due in transaction (Purchase Total)
- Six-digit AUTH# for Refunds and Void
Reports

Masking on reports
To reduce the risk of fraudulent card use, masking and/or truncation is applied to card numbers printed on reports. The expiry date is not printed.

Reprint merchant receipt [66]
Prints a duplicate of the Merchant Copy receipt.

1. Press the Admin key, select REPORTS, and select TRANS INQUIRY.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears, key in your Clerk ID, and press the green key.

2. Identify the transaction (follow the prompts).
   - When PRINT OR DISPLAY? appears, press the key (DISPLAY), scroll to the transaction, and press the green key. Then press the key (REPRINT).

Clerk subtotals report [82]
Prints transactions by Clerk ID for one, a group, or all clerks. Transactions are grouped by type and itemized under card type. Grand total amount(s) also appear for each Clerk ID.

Note: Clerk Subtotaling must be enabled.

1. Press the Admin key, select REPORTS, and select CLERK INQUIRY.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.

2. Select the number of clerks to include:
   - For one clerk, press the key (SINGLE). When ENTER CLERK ID appears, key in a Clerk ID, and press the green key.
   - For a specific group of clerks, press the key (MULTIPLE), then select GROUP. When ENTER GROUP ID TO BE PROCESSED appears, key in the Group ID and press the green key, then select PROCESS LIST.
   - For all clerks, press the key (MULTIPLE) then select ALL CLERKS.

The report prints, and the READY screen appears.
Current batch totals report [99]
Prints a report listing transactions by card type for the current batch (terminal) without closing the batch. Grand totals by transaction type are also included in the report.

1. Press the Admin key, select REPORTS, then select CLOSE BATCH.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears, key in your Clerk ID, and press the green key.

   CLOSE BATCH appears, and then the report prints.

2. When CLOSE BATCH? appears, press the key (NO) to finish printing without closing the batch.

   The report prints, and the READY screen appears.

Merchant sub-totals report [95]
Prints a list of transaction type totals by card type for the current batch from the Moneris host. Grand totals by transaction type are also included.

1. Press the Admin key, select REPORTS, and select MERCH SUBTOTAL.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears, key in your Clerk ID, and press the green key.

   The report prints, and the READY screen appears.

Pre-auth list [62]
Prints a list of Pre-Auths and identifies open Pre-Auths that need to be completed or cancelled.

1. Press the Admin key, select REPORTS, then select PRE-AUTH LIST.
2. When SWIPE ADMIN CARD appears, swipe your POS Admin card, or press the green key to continue.
   - If ENTER CLERK ID appears, key in your Clerk ID, and press the green key.

3. Select OPEN or CLOSED (for completed or cancelled Pre-Auths) or BOTH (for both types).

4. To print the report by date, press the key (DATE). To print the report by batch, press the key (BATCH).

5. To print the current date or batch, press the green key. To select a specific date or batch, key in a date or batch number, and press the green key.

   The report prints, and the READY screen appears.
Balance inquiry report [94]
Prints the number of balance inquiries by card type for the current batch. A grand total of inquiries is displayed at the bottom of the report.

1. Press the Admin key, select REPORTS, and select BAL INQ REPORT.
2. When SWIPE ADMIN CARD appears, swipe your POS Admin card.
   The report prints and the READY screen appears.

Configuration report [16]
This report lists terminal parameters and values.

1. From the READY screen, press the Admin key twice, key in 16, and press the green key.
2. When PRINT TRAILER MESSAGES? appears, press the key (NO). The report prints.

Tip totals report [96]
Prints a summary of Tip amounts entered on the terminal for transactions in a specified batch or a specified date range.

*Note:* If Clerk Subtotalling is enabled, Tip amounts are summarized by Clerk ID.

1. Press the Admin key, select REPORTS, then select TIP TOTALS.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears:
     - to print the Tip total for a specific clerk, key in a Clerk ID;
     - to print Tip totals for all clerks, press the green key.
     The PRINT DATE OR BATCH? prompt appears.
2. For totals by date, press the key (DATE); for totals by batch, press the key (BATCH).
   - If DATE is selected:
     a. When START DATE appears, key in the start date (YYMMDD), and press the green key.
     b. When START TIME appears, key in the start time (HHMM, 24-hour clock), and press the green key.
     c. When END DATE appears, key in the end date (YYMMDD), and press the green key.
     d. When END TIME appears, key in the end time (HHMM, 24-hour clock), and press the green key.
   - If BATCH is selected, key in the batch number, and press the green key.
   The report prints, and the READY screen appears.
Admin functions

Logon [02]
If PLEASE LOGON appears, you are required to log on.

1. Press the Admin key, select ADMIN, then select LOGON.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   The READY screen appears within 60 seconds.

Logoff [03]
To ensure unauthorized transactions cannot be processed, log off your terminal at the end of each business day.

1. Press the Admin key, select ADMIN, then select LOGOFF.
   The PLEASE LOGON prompt appears within 60 seconds.

Re-initialization [01]
Moneris Customer Care may ask you to re-initialize your terminal if changes have been made to it or your merchant account.

1. Press the Admin key, select CONFIGURATION, then select INITIALIZATION.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If RETAIN CURRENT MERCH SETTINGS? appears, press the key (YES) to keep all parameters set as they are.
   - If MERCHANT ID appears, simply press the green key.
   - If PHONE NUMBER appears, simply press the green key.
2. Wait while the terminal communicates with the Moneris host.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card to log on.
3. When the READY screen appears on the terminal, it is ready to process transactions.
End-of-day process

Merchant close

If your merchant account is set up for Merchant Close settlement, you must process a Batch Close transaction in order to have the funds from your POS transactions deposited to your business account. Here’s how:

Step 1: Print a stored transactions report [60]

1. Press the Admin \[\#\] key, select REPORTS, and select TRANS LIST.

2. When SWIPE ADMIN CARD appears, swipe your POS Admin card, or press the green \[\#\] key to continue.
   - If ENTER CLERK ID appears, key in a Clerk ID and press the green \[\#\] key to print totals for that Clerk ID, or simply press the green \[\#\] key to print totals for all Clerk IDs.
   
   The PRINT DATE OR BATCH? prompt appears.

3. Press the \[\#\] key (BATCH) to print the report by Batch.

4. Press the \[\#\] key to print the report for the current batch.
   
   The PRINT TOTALS ONLY? prompt appears.

5. Press the \[\#\] key (YES) to print only the Terminal Batch Totals (including the Cashback total).
   
   The report prints, and the READY screen appears.

Step 2: Process a close batch transaction [99]

1. Press the Admin \[\#\] key, select REPORTS, and select CLOSE BATCH.
   - If SWIPE ADMIN CARD appears, swipe your POS Admin card.
   - If ENTER CLERK ID appears, key in your Clerk ID, and press the green \[\#\] key.
   
   CLOSE BATCH appears, and then the report prints.

2. When CLOSE BATCH? appears, press the \[\#\] key (YES) to close the batch and have funds deposited to your account.
   
   The terminal finishes printing the report and returns to the READY screen.

Step 3: Confirmation

Confirm that the totals on the Stored Transactions report (printed in step 1) match the totals on the Batch Totals report (printed in step 2). If they do not match, call Moneris Customer Care toll-free at 1-866-319-7450 the next business day for reconciliation assistance.
System close

If your merchant account is set up for System Close settlement, Moneris automatically closes your batch for you at the end of each day. You must verify transaction totals on a daily basis. Here’s how:

**Step 1: Print a stored transactions report [60]**

See page 55.

**Step 2: Print a merchant subtotals report [95]**

See page 52.

*Note:* The Merchant Subtotals report must be printed before 11:00 p.m. local time.

**Step 3: Confirmation**

Confirm that the totals on the Stored Transactions report (printed in step 1) match the totals on the Merchant Subtotals report (printed in step 2). If they do not match, call Moneris Customer Care toll-free at 1-866-319-7450 within 30 days for reconciliation assistance.
**Troubleshooting**

If an error message appears, first press the green key or the red key to clear the message then retry the transaction. If the error message reappears and is listed in the table below, follow the instructions in the table. If the problem is still not resolved, call Moneris Customer Care toll-free at **1-866-319-7450**.

### Error messages

<table>
<thead>
<tr>
<th>Message</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>AMOUNT EXCEEDED</strong></td>
<td>The Refund amount was greater than the Refund Limit. Refer to REFUND LIMIT EXCEEDED on page 59.</td>
</tr>
<tr>
<td><strong>CARD BLOCKED REMOVE CARD</strong></td>
<td>The chip card cannot be used. Ask for another form of payment.</td>
</tr>
<tr>
<td><strong>CARD NOT SUPPORTED PLEASE RETRY</strong></td>
<td>Try swiping the card again. If this message reappears, request another form of payment.</td>
</tr>
</tbody>
</table>
| **CARD PROBLEM**              | Retry the transaction. If the message reappears:  
  - If credit card was swiped: Key in the card number.  
  - If debit card was swiped: Request another form of payment.  
  - If card was inserted: Swipe the card. |
| **CARD REMOVED**              | The chip card was removed during the transaction.  
  1. Retrieve the iCT250 or iPP320.  
  2. Press the green key until the READY screen appears.  
  3. Retry the transaction. |
| **CHECK PHONE THEN TAP AGAIN** | The customer’s mobile device (e.g. smartphone) requires a response. The customer performs the following actions:  
  1. Checks their mobile device and responds to any prompts displayed there, e.g. they may need to enter a passcode on their mobile device.  
  2. On the iCT250 or iPP320, presses the green key or waits for the SWIPE/INSERT/TAP CARD prompt to re-appear.  
  3. Taps the mobile device again. |
| **CHECK PINPAD**              | 1. Press the red key on the iCT250 to cancel the transaction.  
  2. Check the PINpad cable, and retry the transaction. |

### Equipment issues

<table>
<thead>
<tr>
<th>Issue</th>
<th>Solution</th>
</tr>
</thead>
</table>
| **TCP CONNECTION FAILED or HOST CONNECTION FAILED** | If the terminal is configured for IP:  
1. Confirm that the Ethernet cable is securely plugged into the ETH port on the Magic Box.  
2. Check that the router and hub/switch (if any) are functioning (refer to the [IP Readiness Checklist](moneris.com/checklist) to confirm that firewall rules have been updated).  
3. Confirm that the network is functioning.  
   - **Public Internet**: Contact your ISP (Internet service provider) for assistance.  
   - **Corporate WAN**: Call your corporate help desk to confirm that the corporate WAN is functioning properly.  
4. If the error message still appears, refer to *Communications Troubleshooting* on page 17 and begin at step 5. |
| **You need to advance receipt paper from the printer.** | While the terminal is powered on, press and hold down the yellow key until the paper advances to the desired length.  
*Note*: If the lid is closed, DO NOT attempt to manually pull the paper from the printer as this will damage the printer. |
| **The display screen is blank.** | 1. Check all cables to ensure that everything is plugged in correctly.  
2. If the screen is still blank, call Moneris Customer Care. |
| **The Ethernet icon at the top of the terminal screen is not coloured green.** | If the terminal is configured to use Ethernet communication, see the solution for TCP CONNECTION FAILED above. |
| **The receipt paper is coming out of the printer but nothing is printed on it.** | The paper roll is incorrectly installed in the paper well. Ensure that when the paper unrolls, it unrolls towards the top of the terminal over the printer.  
If the paper unrolls over the display screen, remove the paper roll from the paper well and place the roll back inside the well so that the paper unrolls over the printer. See page 12 for instructions. |
<table>

</tr>
</thead>
<tbody>
<tr>
<td>The paper well won't close.</td>
<td>The printer paper roller may have popped out of place. Press gently but firmly on the loose end of the printer roller to pop it back into place. Then close the printer lid.</td>
</tr>
</tbody>
