Tips for designing your Promo Cards

Select a design template from our library or select a solid colour background; then place your promotional message and logo overtop.

If a card contains an image or a busier design, add one of the blank shapes supplied overtop and place your promotional message and logo on the shape.

You’re ready to start your Promo Card campaign, but is your staff? Customers may look to your front-of-line employees for answers. Here are some ways to ensure they’re ready to help customers with their Promo Cards.

1. Ensure each employee understands the promotional offer and redemption period before the promotion begins.
2. Train each employee on how to redeem the cards through your POS system.
3. Walk-through a troubleshooting scenario to ensure employees know how to solve problems on the spot.
4. Create a simple “cheat sheet” of some of the most common questions and answers employees could encounter, such as the redemption period or usability requirements.

At the end of each promotion, consider:

- Did I achieve my intended business objective?
- What worked well with the promotion?
- What didn’t work so well with the promotion?
- What can I do differently next time to improve the success of the promotion?

We would recommend the Moneris Promo Gift Card program […] It creates repeat customers and incentivizes customers to spend more money.
